The image shows a vertical subtraction problem using base ten blocks and a decomposition diagram. The top part shows the subtraction of 238 from 447. The top number 447 is represented by four purple blocks (each containing '447') and the bottom number 238 is represented by two purple blocks (each containing '238'). A horizontal line separates the two numbers. To the right of the blocks, there is a diagram showing a purple block with a diagonal line and the word 'XIN' written on it, indicating a decomposition. Below this, there is a row of ten 'x' marks, with the first nine marked with a purple 'x' and the last one with a black 'x', representing the decomposition of one unit into ten tenths.

$$\begin{array}{r} 447 \\ - 238 \\ \hline 209 \end{array}$$
